

ECONARES Brand Tokens

Generated 2026-06-16 from `APPROVED Logo.png` (7200×7200, 4.3 MB, non-interlaced PNG).

Source file preserved at `C:\Users\reyma\.hermes\desktop-attachments\APPROVED Logo.png` and `Logo_source.png` in this folder.

Logo description

Mark: Emblem-style logo. Top 60% is an industrial illustration — construction site (scaffolding, tower crane, cement mixer) on the left, city skyline + cargo ship in the center, mountainous terrain with excavator and dump truck on the right, set against a dusky blue-gray sky. Bottom 40% is the **ECONARES** wordmark with the tagline **CONSTRUCTION · TRADING · SHIPPING · EARTHMOVING** below it. The whole logo is enclosed in a thick dark-gray rounded rectangular border.

Symbolism: Comprehensive service (construction, shipping, trading, earthmoving) under one brand. Duality of professional/grounded illustration + dynamic colorful typography = reliable + innovative.

Primary color palette (brand name + tagline)

Token	Hex	Use
--brand-red	#F5251D	"EC" in ECONARES, primary CTA buttons, error / urgent
--brand-orange	#F78D1E	"O" in ECONARES, hover states, secondary CTAs
--brand-yellow	#FDE126	"NA" in ECONARES, highlights, badges, ribbons
--brand-sky	#6DA6E3	"R" in ECONARES, informational sections, link
--brand-blue	#0033FF	"ES" in ECONARES, footer bg, link emphasis, primary brand blue
--brand-green	#6AFE01	Tagline text, "verified" / trust tags, success
--brand-deep	#002A54	"N" and text panel bg, hero text, dark sections
--neutral-0	#FFFFFF	Page background, contrast text on dark

Secondary / neutral palette (illustration)

Token	Hex	Use
--brand-slate	#2E343B	Body text, borders, darkest shadows
--brand-sky-mute	#4F6876	Section backgrounds, muted text

Token	Hex	Use
--brand-mountain	#20293B	Mount, dark illustration
--brand-tan	#A98F7A	Construction-service accents
--brand-khaki	#DCD3A6	Marine-service accents, machinery
--brand-city	#5A7995	City buildings
--neutral-100	#F5F5F5	Card backgrounds
--neutral-900	#0E1116	Body text on light bg
--neutral-300	#D0D5DB	Borders, dividers

Contrast / accessibility notes

The following brand colors **fail WCAG AA on white background for body text** and must be used only as decorative/background tints or for large display text $\geq 24\text{px}$:

- brand-sky (#6DA6E3) — contrast vs white $\sim 2.6:1$
- brand-green (#6AFE01) — contrast vs white $\sim 1.6:1$
- brand-yellow (#FDE126) — contrast vs white $\sim 1.4:1$

These all pass AA on the dark --brand-deep background and are appropriate for the logo on its own dark panel. For body copy and form labels, use:

- brand-slate (#2E343B) on white — contrast $\sim 12:1$ ✓ AAA
- brand-blue (#0033FF) on white — contrast $\sim 8.6:1$ ✓ AAA
- neutral-900 (#0E1116) on white — contrast $\sim 19:1$ ✓ AAA

Typography

Role	Font	Weight	Size (desktop / mobile)
Display / H1	Montserrat	ExtraBold (800)	56 / 36 px
H2	Montserrat	Bold (700)	40 / 28 px
H3	Montserrat	Bold (700)	28 / 22 px
Body	Inter	Regular (400)	16 / 16 px
Body strong	Inter	Semibold (600)	16 / 16 px
Small / captions	Inter	Regular (400)	14 / 14 px
Tag labels / nav	Barlow Condensed	Bold (700)	14 / 14 px, uppercase, letter-spacing 0.05em
Spec table headers	Barlow Condensed	Bold (700)	14 / 14 px, uppercase

Role	Font	Weight	Size (desktop / mobile)
Buttons	Inter	Semibold (600)	16 / 16 px, uppercase, letter-spacing 0.04em

Why Montserrat: closest Google-Font match to the logo's blocky rounded display style. Alternatives: Poppins Black, Nunito Black.

Why Inter: modern, optimized for screens, neutral — keeps the colorful logo and brand tokens as the visual focus.

Why Barlow Condensed: wide, geometric, all-caps feel — matches the tagline "CONSTRUCTION · TRADING · SHIPPING · EARTHMOVING" energy.

Logo usage rules

- **Clear space:** minimum clear space = height of the "E" in ECONARES, on all sides.
- **Minimum size:** 120 px wide on screen, 25 mm wide on print.
- **Backgrounds:** use on `--brand-deep` (preferred) or white. Never on `--brand-yellow`, `--brand-green`, or `--brand-sky` (insufficient contrast).
- **Don'ts:** don't recolor, don't stretch non-uniformly, don't outline, don't place on busy photography without a solid background panel.

Asset deliverables checklist

For the build agent to produce:

- ☐ `logo-full.svg` — full emblem logo (vector, primary)
- ☐ `logo-mark.svg` — just the icon part (top 60%) for favicons and small uses
- ☐ `logo-wordmark.svg` — just "ECONARES" wordmark with tagline for headers
- ☐ `logo-mono-white.svg` — single-color white version for dark backgrounds
- ☐ `logo-mono-slate.svg` — single-color slate version for light backgrounds
- ☐ `favicon.ico` — 32×32 from the icon mark
- ☐ `apple-touch-icon.png` — 180×180 from the icon mark
- ☐ `og-default.jpg` — 1200×630 social-share image with logo + tagline

Source image

The original `APPROVED Logo.png` is 7200×7200, 4.3 MB, 8-bit RGB. A copy is preserved in this folder as `logo_source.png`. For favicon and OG-card rendering, the icon mark should be cropped from the top 60% of the original.
