

Overview

ECONARES — trade name of **ECE Construction and Resources OPC** — is a SEC-registered Philippine construction-and-trading company headquartered in Talisay City, Cebu. The brand carries two visual registers that must coexist on every surface:

1. **Industrial gravitas** — the deep navy (#002A54) and slate (#2E343B) of the logo's industrial illustration. This is the "we move tonnage, we pour concrete" voice: dense, serious, accountable.
2. **Cebu energy** — the multicolored wordmark (red → orange → yellow → sky → blue) and the lime-green tagline. This is the "we are a real Philippine company, we are reachable, we answer the phone" voice.

The whole design system is built on the tension between those two registers: solid navy + slate structure, with brand-color accents that land on the moments of conversion (CTAs, trust strips, RFQ buttons) — never on body copy. Three of the brand colors (sky, green, yellow) fail WCAG AA on white and are reserved for backgrounds, tags, and large display only.

Colors

- **Primary** #002A54 (**Deep Sea Blue**) — the "N" in ECONARES, hero text, footer background, sticky header on scroll. The structural color of the site. AA on white for headlines.
- **Secondary** #2E343B (**Dark Slate**) — body text, borders, darkest shadow areas. 12:1 contrast on white — AAA for all text sizes.
- **Tertiary** #F5251D (**Vibrant Red**) — the "EC" in ECONARES, primary CTA buttons, urgent/error states, section eyebrows. The single most important accent for conversion. 5.4:1 on white — AA.
- **Accent** #F78D1E (**Bright Orange**) — the "O" in ECONARES, primary CTA hover state, secondary CTAs, focus rings. 3.0:1 on white — not for body copy, fine for buttons and large display.
- **Highlight** #FDE126 (**Sunny Yellow**) — the "NA" in ECONARES, highlight badges, ribbon accents, decorative panels. 1.4:1 on white — background-only, never body copy.
- **Sky** #6DA6E3 — the "R" in ECONARES, informational section accents, secondary links in footer. 2.6:1 on white — background-only.
- **Blue** #0033FF (**Royal Blue**) — the "ES" in ECONARES, footer link emphasis, link text in body (8.6:1 on white — AAA). Use for in-body hyperlinks.
- **Green** #6AFE01 (**Lime Green**) — the tagline color, "verified" / trust tags, success states. 1.6:1 on white — always on dark backgrounds.
- **Neutral** #FFFFFF (**Pure White**) — page background, button text on dark, primary text on dark.

- **Surface** #F5F5F5 (**Light Gray**) — alternating section backgrounds, card backgrounds, spec-row striping.
- **Border** #D0D5DB (**Mid Gray**) — hairlines, card borders, input borders.
- **Ink** #0E1116 (**Near-Black**) — body text on light backgrounds, replaces pure black for less harsh reading.
- **Muted** #4F6876 (**Industrial Sky**) — section backgrounds, muted captions, helper text. 6.2:1 on white — AA for body.

Composition rule: navy/slate/ink/white/muted carry the structure ($\geq 80\%$ of any page). Brand colors (red/orange/yellow/sky/blue/green) carry the conversion moments ($\leq 20\%$ of any page). Never two competing brand colors in the same row — one accent per call to action.

Typography

Three families, each with a specific job:

- **Montserrat ExtraBold (800)** for h1/h2/h3 — closest Google Font to the logo's blocky rounded display. Web-friendly, ships small subset.
- **Inter (400 / 600 / 700)** for body, buttons, spec tables — the workhorse. Optimized for screen reading at 14–18px.
- **Barlow Condensed Bold (700), all-caps, +0.08em tracking** for tags, eyebrows, nav, and the "CONSTRUCTION · TRADING · SHIPPING · EARTHMOVING" service labels. Wide, geometric, all-caps feel — matches the tagline energy.

Type scale (desktop, mobile in parens): h1 56/36px, h2 40/28px, h3 28/22px, body-lg 18/18px, body-md 16/16px, body-sm 14/14px, tag 14/13px, button 16/16px.

Line-height: display 1.1, headings 1.15–1.2, body 1.5–1.6, tags/buttons 1.0.

Rationale: the colorful wordmark is the visual focus of the brand. Body type must disappear. Montserrat ExtraBold gives the logo a digital cousin; Inter's neutrality keeps the colorful brand tokens as the visual focus; Barlow Condensed is the only "tag" voice that matches the tagline's energy.

Layout

- **Container:** max-width 1280px, side padding 24px mobile / 40px desktop.
- **Grid:** 12-column on desktop (with 24px gutter), 6-column on tablet, 4-column on mobile (16px gutter). No fixed pixel columns — use CSS grid with `repeat(auto-fit, minmax(280px, 1fr))` for product cards.
- **Section vertical rhythm:** 96px top/bottom on desktop, 64px on mobile. One section per visual idea.
- **Hero:** split layout. Left 50%: H1, subtitle, two CTAs. Right 50%: rotating image carousel (4 photos). Min-height 600px desktop, 500px mobile.

- **Cards:** product/service cards use a 1:1 thumbnail + 1.5x text height ratio. Use `--rounded.lg` (12px) for industry feel, not the consumer-tech 24px.

Elevation

- **Flat by default.** No drop shadows on the navy header or footer — they're already dark.
- **Cards:** subtle two-stop shadow on rest, larger on hover (the `--shadows.card` / `--shadows.card-hover` tokens). No glassmorphism.
- **Sticky header:** one subtle shadow on scroll (`--shadows.sticky-header`).
- **Modals/overlays:** 0 20px 50px rgba(0,0,0,0.20).

Shapes

- **Buttons:** 8px radius — feels industrial, not consumer-app.
- **Cards:** 12px radius.
- **Tags/badges:** fully pill (`--rounded.pill`).
- **Input fields:** 8px radius.
- **No blob shapes, no wavy hero dividers, no organic SVG backgrounds.**

Components

Buttons

- **Primary (red):** red background, white text, uppercase Inter SemiBold 16px with 0.04em tracking. 14px × 28px padding. Hover swaps to orange with ink text — the only allowed two-color hover transition.
- **Secondary (white with navy border):** white background, navy text and border, 2px solid. Hover fills with navy, inverts text to white.
- **Focus ring:** 2px solid orange (`#F78D1E`), 2px offset, always visible on keyboard focus. Never remove the outline.

Navigation (sticky header)

- White background, 80px height desktop / 64px mobile, bottom border `--border` 1px.
- Left: ECONARES logo wordmark (SVG from `logo-wordmark.svg`).
- Center: 6 main nav items (HOME, ABOUT, PRODUCTS, SERVICES, PROJECTS, CONTACT). Active item is red (`--tertiary`).
- Right: phone icon + "(+63 32) 232 6280" link, plus a "Request Quote" red button.
- Mobile: hamburger → full-screen overlay nav.

Cards

- **Product card:** 1:1 thumbnail top, 16px padding bottom. Category eyebrow (Barlow Condensed, red), product name (h3, navy), 1-line spec summary, "Specs & RFQ →" link (red).

- **Service card:** icon top-left (24px, navy), name (h3, navy), 2-line description, "View services →" link.
- **Project card:** 4:3 thumbnail top, overlay gradient bottom 30%, project name (white, h3), industry + year caption (Barlow Condensed, white 80%).

Spec table (product detail page)

- Header row: navy background, white Barlow Condensed text, all caps.
- Body rows: alternating white / `--surface` (light gray).
- First column: Barlow Condensed tag (red), all caps.
- Second column: Inter 15px, ink text.
- Border between rows: 1px `--border`.

Trust badges / credentials strip

- Pill shape, 6px × 14px padding, navy background, lime-green Barlow Condensed text.
- 4-5 badges per strip: "SEC-Registered · DTI 2015 · DTI 2019 · PCAB Licensed · 15+ Years in PH Heavy Industry".

Hero (homepage)

- H1: navy text, max 3 lines. Subtitle: ink 18px, max 2 lines.
- Two CTAs stacked or side-by-side. Primary red "Request Fuel Quote" (links to /contact?type=product). Secondary navy-bordered "Discuss a Project" (links to /contact?type=service).
- Right: 4-image carousel (coal stockpile, vessel loading, construction site, minerals yard) with 5s autoplay and 4s fade.

Footer

- Navy background, white headings, sky-blue body links (hover highlight yellow).
- 4 columns: Company / Products / Services / Contact.
- Bottom strip: 1px sky-blue border top, "© 2026 ECE Construction and Resources OPC" + SEC registration number + links to Privacy and Terms.

Do's and Don'ts

Do:

- Use red (`--tertiary`) for the single most important action on every page.
- Use Barlow Condensed for the "CONSTRUCTION · TRADING · SHIPPING · EARTHMOVING" service labels in any icon row or footer summary.
- Keep body type Inter. Headlines Montserrat ExtraBold.
- Use real photos of coal, vessels, and construction sites (not stock photos) on the homepage and project pages.

- Display the landline (+63 32) 232 6280 and the Yahoo email in the sticky header — Filipino B2B buyers call.
- Add a sticky bottom-bar on mobile with "Call Now" (red) and "WhatsApp" (green) buttons.

Don't:

- Use the brand red, orange, yellow, sky, or green for body copy on white — they fail WCAG AA. Body text is always ink, slate, or muted on light; white on navy.
- Stack more than two brand colors in the same row.
- Use glassmorphism, blur effects, or aggressive gradient backgrounds. The brand is industrial.
- Use decorative SVG illustrations or icon-spam card grids.
- Use fake metrics, placeholder testimonials, or AI-fluff section names like "Insights", "Growth", "Scale".
- Use the logo on --highlight (yellow), --green, or --sky backgrounds — insufficient contrast.
- Strip the outline on focus. Always visible.
- Hide the phone number behind a "Contact us" link.
